Personal Statement

I have worked in the content creation industry for over 5 years now, mainly creating commercials, adverts and corporate content along with helping out with some Drama's, short films, events and game show series. Most of this time has been with my current job at a production company in Birmingham called Spark Media. With this I have accumulated skills and knowledge in all processes throughout every project from start to finish. Working with a wide array of gear including Sony, Arri, RED, Aputure and DJI for production along with the Adobe creative suite and Davinchi for post production. I have worked on content for Carlsberg, Diageo, Samurai Sports, BBC, Commonwealth Games, The Perfume Shop and much more. From the knowledge I have accumulated over the years this has allowed me to help clientele make sure their creative needs are met but also being able to show what logistically works the best with the time, resources and budget. This has allowed me to be able to make choices and suggestions to make sure that the project is run efficiently with transparency and a clear goal to work towards. Outside of work I still create my own edits of filming and photography for passion projects and I also work as a high level snowboard instructor in the domes in the UK and away in resorts.

Own Equipment

- Sony A7siii and Sony a7sii
- Gopro 8
- Canon 5d Mkiv
